

Petition to put Parkinson's disease on the list of diseases presumptive to agent orange (herbicide) exposure.

Whereas a large number of Vietnam Veterans have Parkinson's and there are studies that support the connection of herbicides and Parkinson's, and Whereas these veterans are getting Parkinson's disease on the average 12 years earlier than the general population get Parkinson's, and Whereas a Study out of Stanford University shows Vietnam Veterans have a 2.6 times greater risk of Parkinson's than people never deployed to Vietnam and Where as an NIH Study connects Agent Orange 2,4,5-T directly to Parkinson's, We petition you, to support and co-sponsor legislation to put Parkinson's Disease on the list of disease Presumptive to Agent Orange (herbicides) exposure. My signature authorizes USMVP to email, fax or writemy representative in my name on this issue.
